Subject: Bovine tuberculosis

Hello,

If you can, please provide me with the number of cattle herds in New Zealand which have been issued with a restriction due to the results of a tuberculosis test. I would like to know the number of herds which have been restricted from 1st Jan to 31st Dec for each of the years 1998 to 2007 inclusive.

Please also provide me with the total number of cattle herds which existed for each of these years.

If you can, please also provide me with estimates for these two figures for 2008.

I only require overall figures and so do not require a breakdown by district.
